WHAT IS USDMINER?

USDMiner is a fiery deflationary token with 14% USDT auto reflections.

Fair-launched on PancakeSwap on December 30th, 2021. (Binance Smart Chain, BEP20). Simply hold USDMiner and earn passive income in USDT.

The USDMiner token is designed to be scarcer over time via its Buyback and Burn mechanisms. It is a HYPER DEFLATIONARY token, which means the longer you hold, the more valuable it becomes.

The strategic Buyback and Burn mechanisms will constantly reduce the circulating supply, hence driving regularly the price up. Moreover, with less circulating supply, a higher share of USDT auto rewards is paid to you.

In the USDMiner midterm roadmap, we'll also be launching a series of utilities and real use-case platforms to generate various sources of revenue.

These continuous loops of positive price action will reward you greatly in terms of price appreciation and reflections.

TW [@usdminerbsc](#)

Phase 1:

- Post fair launch marketing
- Strategic buyback & burn
- Engaging Youtube influencers
- Engaging Twitter influencers
- Ask Me Anything (AMA) with highly influential Telegram groups
- 1,200 holders milestone
- \$1 million market capitalization milestone

Phase 2:

- 1st utility voting by holders
- Based on voting results, 1st utility implementation into the USDMiner's ecosystem
- Continuous strategic buyback & burn
- 5,000 holders milestone
- \$10 million market capitalization milestone
- The official launch of 1st utility
- Revenue generation from 1st utility
- Buy Back & Burn with generated revenue for further positive price action (USDMiner tokens become more & more valuable)
- CoinGecko listing
- CoinMarketCap listing
- 2nd utility voting by holders

Phase 3:

- Implementation of 2nd utility into the USDMiner's ecosystem
- The official launch of 2nd utility
- Revenue generation from 2nd utility
- Further buyback & burn with revenue generated from 2nd utility, 1st utility & buy/sell tax. Consistent price & market capitalization growth for USDminer (becoming more & more valuable)
- 3rd & 4th utility voting
- Implementation of the 3rd & 4th utility
- The official launch of the 3rd & 4th utility
- Revenue generation from the 3rd & 4th utility
- 20,000 holder milestone
- \$50 million market capitalization milestone
- Centralized exchange listings: Gate.io, Kucoin, Binance, Coinbase

LAST BUT NOT LEAST

USDMiner is not only a hyper deflationary token that is having higher & higher value. It also rewards holders with USDT through the auto-reflection mechanism of its autonomous Binance Smart Chain Smart Contract.

To further differentiate ourselves from most of the deflationary token projects and auto reward projects, we do dedicate ourselves to adding in real use cases (voting to be done by holders) to generate real revenues from the global market.

With many real use cases being implemented along the way, USDMiner will stand out prominently and strive in the very competitive crypto space.

Let's all of us do extremely well riding on the USDminer platform. Developers, team members, holders & users of our utilities will be well taken care of.
